Review of Protocol #1795 and records for NHP # 565, #608, #607: According to the NHP's records, and injectable anesthetic was administered prior to a research activity; however, the administration of an anesthetic was not described in the IACUC approved protocol.

The IACUC must review and approve any proposed significant changes to ongoing research activities before the proposed changes can be implemented by the investigator. The IACUC needs to address this issue.
